Underage Drinking Can Detour Academic Success

60% of college students drink (ages 18-22)¹

25% of Sr. High students drink (ages 16-17)¹

11% of Jr. High students drink (ages 14-15)¹

2% of middle school students drink (ages 12-13)¹

1 out of 4 college students missed a class and 1 out of 5 did poorly on a test or project due to alcohol use.²

Students who binge drink (5+ drinks/occasion) are 3 times more likely than those who don’t to get mostly Ds and Fs on their report cards.²

Alcohol harms the developing brain and affects learning.³

Nearly 1 million youth under age 15 start drinking each year.³

Preschool/Elementary School Behavioral problems can increase risk of alcohol use in later years.⁴

Drinking Affects Student Performance at Every Level
